

Banjo Verify Plug-in with Batch Print

Quick Start Guide

For complete descriptions of these steps, and for important information about digital signatures and security, be sure to read the full help file document.

Installation and Initial Setup

- 1** Install plug-in from downloaded installer program.
- and optionally...**
- 2** Install PDFCreator printer driver (see help documentation).
- 3** Customize PDFCreator printer driver settings as described in help documentation.

Certificate Import (one-time setup for each client who sends you signed documents)

- 1** Request public-key exported certificate from the client (delivered by email or on disk or CD-ROM).
- 2** Import certificate as described in help documentation.

Signed PDF Processing (do each time a signed PDF is sent for printing)

- 1** Launch Adobe Acrobat
Choose PDFCreator as the printer.
- 2** Choose **Batch Print** from the **Banjo** menu.
- 3** Add signed PDF files to Batch Print window for printing.
Convert files to TIFF format.
- 4** Process TIFF files with your plot management software for printing.

Or...

- 1** Launch Adobe Acrobat
Choose a Windows printer driver for your large-format printer.
- 2** Use the Acrobat **Print** command or the Banjo Batch Print feature to print the PDFs directly to your printer.
